ISIS

The Foremost International Journal Devoted to the History of Science and Its Applications

Organ of the History of Science Society

(Constituent of the American Council of Learned Societies)

EDITORIAL COMMITTEE: Marshall Clagett, University of Wisconsin; I. Bernard Cohen (Editor and Chairman), Harvard University; I. E. Drabkin, City College, New York; John F. Fulton, Yale University School of Medicine; Henry Guerlac, Cornell University; Conway Zirkle, University of Pennsylvania.

The History of Science Society has members in all parts of the world, and in every field of creative activity and scholarship. By its constitution it is intended to encourage and maintain an active interest in the history of science in general, as well as in the particular sciences. In actual practice, its function is much wider, for the Society serves to bridge the gulf between the humanities and the sciences, by suggesting the humanistic values and meanings of scientific progress and by describing the cultural matrix in which science has grown to its present stature.

ISIS was founded in 1912 by George Sarton. Regular quarterly numbers contain excellent scholarly articles, extensive book reviews, news of current developments in the field of its interests, and regular installments of its famous Critical Bibliography.

Membership in the Society is open to anyone interested in the history of science. The annual dues ($7.50) include a subscription to ISIS. Student membership is $5.00. Sustaining membership is $50.00 or more. Single issues of ISIS are $2.00 each. Subscriptions may be addressed to the Treasurer, The History of Science Society, Burndy Library, Norwalk, Connecticut. Editorial and other communications and requests for back issues of ISIS should be addressed to the Editor, I. Bernard Cohen, Widener Library 189, Cambridge 38, Massachusetts, U.S.A.
